

1. Record Nr.	UNINA9910983075003321
Autore	Koskina Anthi
Titolo	Greek Space Law : Collaborating with a Growing Space-faring Country / / by Anthi Koskina, Manolis Plionis
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2025
ISBN	9783031728136 3031728130
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (276 pages)
Collana	Space and Society, , 2199-3890
Altri autori (Persone)	PlionisManolis
Disciplina	341.4709495
Soggetti	Outer space - Exploration Astronautics Law of the sea International law Aeronautics - Law and legislation Space Aerospace engineering Space Exploration and Astronautics Law of the Sea, Air and Outer Space Space Studies Aerospace Technology and Astronautics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Accession to international space law instruments and organizations -- Impetus gained from the involvement in regional EU space initiatives -- Competent State and non State Greek authorities -- Greek legislation on space activities.
Sommario/riassunto	This book provides an overview of the Greek legislation applying to space activity under the responsibility of the Greek State, as in line with international space law. Greece is not an established space-faring country; however, it is showing particular dynamism, making the most of its participation in international and EU space endeavors. Indeed, along with outstanding achievements in space science Greece took legislative action both at the international and national levels

(proposals at the UNCOPUOS; Greek space law; signing of the Artemis Accords). Hence, the time has come to refer to – and present aspects of – the Greek space legislation. After an introductory section, the book provides information first on the national laws providing for the Greek participation in international space systems and in EU activities, which could be regarded as being the initial steps of Greece in the context of space. Thereafter, the rules applying to Greek space activity per se are presented, focusing on the authorities competent to decide on space matters, then on the substantial law rules allowing for – and clarifying – the application of international space law to domestic space operations. This book presents an overall view and analysis of the Greek space legislation, adding valuable information to the existing bibliography. Included as an appendix is a scholarly translation of the 2017 Greek space law.
