

1. Record Nr.	UNINA9910983313103321
Autore	Rujikiatkamjorn Cholachat
Titolo	Proceedings of the 5th International Conference on Transportation Geotechnics (ICTG) 2024, Volume 3 : Integrating Mega Project Planning, Airfield Behavior, and Rail Transition Zones // edited by Cholachat Rujikiatkamjorn, Jianfeng Xue, Buddhima Indraratna
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2025
ISBN	981-9782-21-X
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (444 pages)
Collana	Lecture Notes in Civil Engineering, , 2366-2565 ; ; 404
Altri autori (Persone)	XueJianfeng IndraratnaBuddhima
Disciplina	624.15
Soggetti	Engineering geology Geotechnical engineering Transportation engineering Traffic engineering Geoengineering Geotechnical Engineering and Applied Earth Sciences Transportation Technology and Traffic Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1: BIO-MODIFICATION OF CONCRETE FOR PAVEMENTS -- Chapter 2: Finite Element Analysis on the Distribution of Stress through Layered Soils -- Chapter 3: Balanced Mix Design in Kansas -- Chapter 4: Economic and easy to use design of the thickness of subbases -- Chapter 5: Impact of Spatial Variability of Material Properties of Compacted Geomaterials on Acceptance -- Chapter 6: Laboratory Testing to Design an Asphalt Treated Permeable Base for the Federal Highway Administration's Pavement Test Facility -- Chapter 7: INVESTIGATION OF RUT FORMATION IN ASPHALT CONCRETE PAVEMENT -- Chapter 8: Evaluating the effects of particle size distribution on the hydraulic capabilities of the granular subbase layers -- Chapter 9: GEOTECHNICAL AND GEOPHYSICAL CHARACTERIZATION OF DELHI METRO TUNNEL ALIGNMENT: SECTION BETWEEN NABI KARIM TO RK ASHRAM -- Chapter 10: Foam penetration behavior in EPB shield

tunneling: Insights from model experiments. etc.

---

## Sommario/riassunto

This book presents select proceedings of the 5th International Conference on Transportation Geotechnics (ICTG 2024). It includes papers on ground improvement methodologies, dynamics of transportation infrastructure, and geotechnical intricacies of mega projects. It covers topics such as underground transportation systems and heights of airfields and pavements. This book discusses diverse thematic landscapes, offering profound explorations into sensor technologies, data analytics, and machine learning applications. The publication highlights advanced practices, latest developments, and efforts to foster collaboration, innovation, and sustainable solutions for transportation infrastructure worldwide. The book can be a valuable reference for researchers and professionals interested in transportation geotechnics.
