

1. Record Nr.	UNINA9910983316003321
Autore	Pevzner Michael
Titolo	Symmetry in Geometry and Analysis, Volume 2 : Festschrift in Honor of Toshiyuki Kobayashi // edited by Michael Pevzner, Hideko Sekiguchi
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Birkhäuser, , 2025
ISBN	9789819776627 9819776627
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (1127 pages)
Collana	Progress in Mathematics, , 2296-505X ; ; 358
Altri autori (Persone)	SekiguchiHideko
Disciplina	512.55 512.482
Soggetti	Topological groups Lie groups Algebra Geometry Mathematical analysis Mathematical physics Topological Groups and Lie Groups Analysis Mathematical Physics Grups topològics Àlgebra Geometria Física matemàtica Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	The source operator method: an overview (Salem Ben Said, Jean-Louis Clerc and Khalid Koufany) -- Some mixed norm bounds for the spectral projections of the Heisenberg sublaplacian (Valentina Casarino and Paolo Ciatti) -- Four variations on the Rankin-Cohen brackets (Jean-Louis Clerc) -- Restricting holomorphic discrete series representations to a compact dual pair (Jan Frahm and Quentin Labriet) -- Nets of

standard subspaces on non-compactly causal symmetric spaces (Jan Frahm, Karl-Hermann Neeb, and Gestur Ólafsson) -- Heisenberg parabolically induced representations of Hermitian Lie groups, Part II: Next-to-minimal representations and branching rules (Jan Frahm, Clemens Weiske and Genkai Zhang) -- Quantum-Classical Correspondences for Locally Symmetric Spaces (Joachim Hilgert) -- Classification of K-type formulas for the Heisenberg ultrahyperbolic operator s for $(,)$ and tridiagonal determinants for local Heun functions (Toshihisa Kubo and Bent Ørsted) -- Gauss--Berezin integral operators, spinors over orthosymplectic supergroups, and Lagrangian super-Grassmannians (Yury A. Neretin) -- Towards Gan-Gross-Prasad type conjecture for discrete series representations of symmetric spaces (Bent Ørsted and Birgit Speh) -- Pseudo-dual pairs and branching of Discrete Series (Bent Ørsted and Jorge A. Vargas) -- Integral transformations of hypergeometric functions with several variables (Toshio Oshima).

Sommario/riassunto

Symmetry in Geometry and Analysis is a Festschrift honoring Toshiyuki Kobayashi. The three volumes feature 35 selected contributions from invited speakers of twin conferences held in June 2022 in Reims, France, and in September 2022 in Tokyo, Japan. These contributions highlight the profound impact of Prof. Kobayashi's pioneering ideas, groundbreaking discoveries, and significant achievements in the development of analytic representation theory, noncommutative harmonic analysis, and the geometry of discontinuous groups beyond the Riemannian context, among other areas, over the past four decades. This second volume of the Festschrift contains original articles on analytic methods in representation theory of reductive Lie groups and related topics. Contributions are by Salem Ben Saïd, Valentina Casarino, Paolo Ciatti, Jean-Louis Clerc, Jan Frahm, Joachim Hilgert, Toshihisa Kubo, Khalid Koufany, Quentin Labriet, Karl-Hermann Neeb, Yury Neretin, Gestur Ólafsson, Bent Ørsted, Toshio Oshima, Birgit Speh, Jorge Vargas, and Clemens Weiske.
