Sommario/riassunto	This book presents the select proceedings of the 3rd International Conference on Intelligent Systems and Applications 2024. The theme of this conference is 'Intelligent Systems for Agricultural Applications'. It covers the topics of intelligent systems in multiple aspects such as sustainable crop production, weather prediction, post-harvest management and agro-processing, digitalization and automation of agri equipment, agriculture warehouse and supply chain management, yield prediction, and quality assessment. The book is useful for researchers and professionals interested in the broad field of artificial intelligence and machine learning.
