

1. Record Nr.	UNINA9910983352303321
Autore	Jia Limin
Titolo	The Proceedings of 2024 International Conference of Electrical, Electronic and Networked Energy Systems : Volume II // edited by Limin Jia, Yi Liu, Zhihong Xu, Longfei Tang, Kai Song, Yonghui Liu
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2025
ISBN	9789819620425 9819620422
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (841 pages)
Collana	Lecture Notes in Electrical Engineering, , 1876-1119 ; ; 1317
Altri autori (Persone)	LiuYi XuZhihong TangLongfei SongKai LiuYonghui
Disciplina	621.31
Soggetti	Electric power production Electronics Electronic circuits Electrical Power Engineering Electronics and Microelectronics, Instrumentation Electronic Circuits and Systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Novel Inertia Control Method with Phase-Locked Error Feedforward in PLL for DFIG-based WTs -- Double-loop Control of Seven-Dimensional Chaos Model of Power System -- Development, Evolution and International Alignment of China's Green Electricity-Green Certificate Policy -- Novel Control Strategy for Single-phase Single-stage Isolated AC/DC Converters -- Dynamic spatial-temporal graph neural network for ultra short-term PV power generation forecasting -- Selective Miniature Circuit Breaker Operation Mechanism Motion Process Mechanical Properties Optimization Analysis -- A Compact All-Solid-State Bipolar Pulse Adder -- A Novel Reluctance Machine with Skewed Magnetized Stator Permanent Magnet for Low-speed High Torque

Density Applications -- Numerical simulation study of the film-forming characteristics of water mist in battery packs -- Research on Influence of Asynchronous Condenser on The Frequency Characteristics of New Energy Power System.

Sommario/riassunto

This conference is one of the most significant annual events of the China Electrotechnical Society, showcasing the latest research trends, methodologies, and experimental results in electrical, electronic, and networked energy systems. The proceedings cover a wide range of cutting-edge theories and ideas, including topics such as power systems, power electronics, smart grids, renewable energy, energy integration in transportation, advanced power technologies, and the energy internet. The aim of these proceedings is to provide a key interdisciplinary platform for researchers, engineers, academics, and industry professionals to present groundbreaking developments in the field of electrical, electronic, and networked energy systems. It also offers engineers and researchers from academia, industry, and government a comprehensive view of innovative solutions that integrate concepts from multiple disciplines. These volumes serve as a valuable reference for researchers and graduate students in electrical engineering.
