1. Record Nr. UNINA9910983355403321

Autore	van Zundert Brigitte
Titolo	Neuroepigenetics Mechanisms in Health and Disease / / edited by Brigitte van Zundert, Martin Montecino
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2025
ISBN	9783031759802 303175980X
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (0 pages)
Collana	Subcellular Biochemistry, , 2542-8810 ; ; 108
Altri autori (Persone)	MontecinoMartin
Disciplina	612.8 153.1
Soggetti	Learning - Physiological aspects Memory - Physiological aspects Epigenetics Biochemistry Cytology Diseases Biology - Technique Gene expression Learning and Memory Mechanisms of Disease Gene Expression Analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Basic Epigenetic Mechanisms -- Chapter 2. Epigenetics in Learning and Memory -- Chapter 3. Epigenetics in Neurodegenerative Diseases -- Chapter 4. The Promise of Epigenetic Editing for Treating Brain Disorders -- Chapter 5. Epigenetic Control in Schizophrenia -- Chapter 6. Environmental Enrichment and Epigenetic Changes in the Brain: From the Outside to the Deep Inside -- Chapter 7. Remodeling the Epigenome through Meditation: Effects on Brain, Body, and Well-Being.
Sommario/riassunto	The book Neuroepigenetic Mechanisms in Health and Disease provides insight into mechanisms of epigenetic control, focusing on molecular,

cellular and integrative aspects of neurobiology. Here, leading investigators in the field discuss in each chapter landmark scientific discoveries and recent advances in (neuro) epigenetics. Whereas some chapters concentrate in overviewing basic epigenetic mechanisms and the power of epigenome editing, other sections of the book discuss epigenetic control during learning and memory as well as in diverse brain related alterations, including neurodegenerative and rare neurologic diseases, and psychiatric disorders. In addition, the book covers relevant topics for modern human societies, including how drug abuse, environmental enrichment and meditation can influence brain function through epigenetic mechanisms. This book aims to serve as a useful source for junior scientists to first learn about the topic, as well as to more experienced researchers that seek for a broader view of this rapidly growing field that is beyond their area of specialization.
