Sommario/riassunto	This book highlights current efforts and research on pollution management and advanced technology for pollution treatment. It presents an overview of various aspects of environmental pollution, including water resources management in minimizing the pollution

effect. Recent achievements in air pollution monitoring and control including sustainable urban design are also discussed. Chapters in the book also focus on tackling food waste disposal and advanced techniques on pollution treatment. The book concludes with a discussion of a special case study on Malaysian agricultural industry efforts to tackle pollution.
