Livello bibliografico	Monografia
Sommario/riassunto	This book explores the interplay between science, technology, and society in the context of a post-truth era. Edited by Emine Öncüler Yayalar and Melike ahinol, it features comparative dialogues on reflexivity and critical perspectives on contemporary issues. The work is divided into sections that address the rethinking of Science and Technology Studies (STS), post-factual politics, participatory research, and case studies. Topics include the spread of gender ideology, anti-politics, and remote work during the COVID-19 pandemic. Aimed at academics and researchers, the book examines philosophical dialogues and critiques to understand the impact of misinformation and ideological bubbles on society.
