

1. Record Nr.	UNINA9910985639203321
Autore	Markad Sandip S
Titolo	The Biology, Management, Aquaculture and Fisheries of Lobsters
Pubbl/distr/stampa	Burlington : , : Arcler Education Inc, , 2024 ©2024
ISBN	9781779560186 1779560184
Edizione	[1st ed.]
Descrizione fisica	1 online resource (242 pages)
Soggetti	Lobsters Fishery management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Half Title -- Title Page -- Copyright -- About The Editor -- Table of Contents -- List of Figures -- Preface -- Chapter 1: Introduction To Lobster Aquaculture -- 1.1 Introduction -- 1.2 Lobster -- 1.3 Growth -- 1.4 Molting -- 1.5 Hormones -- 1.6 Population -- 1.7 Larva -- 1.8 Temperature -- 1.9 Variability -- Chapter 2: Distribution Of Lobsters -- 2.1 Introduction -- 2.2 Lobsters -- 2.3 Species -- 2.4 Development -- 2.5 Evolution -- 2.6 Markers -- 2.7 Enzymes -- 2.8 Distribution -- 2.9 Growth -- 2.10 Fishery Management -- Chapter 3: Management Of Slipper Lobster
Sommario/riassunto	This book delves into the biology, management, aquaculture, and fisheries of lobsters, focusing on their commercial significance and research potential in physiology, biochemistry, and neurobiology. It addresses the ecological and economic pressures faced by lobster populations due to intensive fishing and outdated management practices. The book aims to provide insights into sustainable lobster management and aquaculture techniques, appealing to graduate students and research scientists. Edited by Dr. Sandip S. Markad, an expert in fisheries science, the text serves as a comprehensive guide for understanding lobster biology and fisheries management.
