Films, Books and TV Series -- 4 From Reaction to Direction -- Interlude IV. AI Experiences -- 5 Towards a Digital Criminology -- 6 AI Images -- Acknowledgements -- References -- Notes
Sommario/riassunto	Making Surveillance Public by Marc Schuilenburg explores how AI and algorithms are transforming surveillance and crime control. It examines the deployment of AI applications in devices like Amazon's Ring doorbell and Tesla's Sentry Mode, discussing who uses them, their purposes, and their societal impacts. The book advocates for a digital criminology focused on sociological questions of power, knowledge, and AI experiences, highlighting the expansion of surveillance and its implications for privacy and security.
