Lingua di pubblicazione	Polacco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Plato, Cicero and Machiavelli are considered the classics of political philosophy. Their research constantly stimulates the imagination of researchers and provokes further interpretations. What seemed particularly interesting to me was to illustrate, by dint of deliberations focused on the ethos of a political leader, a certain continuity of thought that can be noticed in the views of these thinkers, and also to indicate the differences appearing in them, resulting from the personal nature of their perceptions and individual understanding of state reality. Despite a keen interest in the writings of Plato, Cicero or Machiavelli, and in the few works that compare ancient thought with the opinions of Renaissance authors, there is still a shortage of this kind of study. My sense of unsatisfaction was augmented by the realization that the work of Francesco Guicciardini – which is a valuable source of information about the social and political situation of Renaissance Florence and offers an additional reference point for Machiavelli's opinions, in this way painting a more complete

picture of the era and allowing a better understanding of the contemporary trends – has not been properly recognized in the Polish literature.

Sommario/riassunto

In 1964 Britain's defence presence in Malaysia and Singapore was the largest and most expensive component of the country's world-wide role. Yet within three and a half years the Wilson Government had announced that Britain would be withdrawing from its major Southeast Asian bases and abandoning any special military role 'East of Suez'. Drawing upon previously classified government records P.L. Pham examines and explains how the Wilson Government came to this conclusion, one of the most significant decisions in the decline of British global power after the Second World War. Substantially revising
