Sommario/riassunto	The subject of the dissertation is the cognitio symbolica in the preaching work of the Franciscan Antoni Wgrzynowicz. It manifests in the author's use of symbolic structures (here senso largo, including allegory, metaphor and other structures based on analogy). There are three terms in the title: sources, applications, and contexts. Thus, „symbolic thinking” is shown not only as a creative technique (application), but also its genesis (sources) and the accompanying, not always obvious, contexts are described.
