Collana	Uniwersytet ódzki
Soggetti	Politics / Political Sciences Politics History Special Historiographies Economic policy International relations/trade Politics of History/Memory Peace and Conflict Studies Wars in Jugoslavia
Lingua di pubblicazione	Polacco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The publication is a novel study in the field of Polish political science regarding collective representations – a category associated mainly with sociology – from the point of view of a political sphere researcher. The theoretical model adopted by the author has been used to outline and analyze the shapes of collective representations of the peoples of the former Yugoslavia in the difficult period of protracted economic crisis and the accumulation of further political problems. The in-depth diagnosis of ordinary people’s feelings about the reality that surrounds them has led to the ascertainment that, over the recent years, rising problems and negative emotions have begun to predominate over optimistic premises, while maintaining stability in the region requires some more determined and well-thought-out actions by the international community. The monograph, written from the

perspective of political science and based on qualitative data, combines the elements of other social sciences and humanities, which appeared necessary to explain the interdisciplinary category of collective representations in an integral manner. This broader view of the complicated Balkan region can contribute to improving the knowledge and understanding of it.
