

1. Record Nr.	UNINA9910988289603321
Titolo	Cutaneous Cancers: An Interdisciplinary Approach // edited by Nima Rezaei
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2025
ISBN	9783031874536 3031874536
Edizione	[1st ed. 2025.]
Descrizione fisica	1 online resource (XI, 332 p. 44 illus., 38 illus. in color.)
Collana	Interdisciplinary Cancer Research, , 2731-457X ; ; 15
Disciplina	571.978 616.994
Soggetti	Cancer Cancer - Treatment Oncology Medical radiology Cancers Cancer Therapy Radiation Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Interdisciplinary Approach in Solid Tumors and Cutaneous Cancers -- Epigenomic Markers in Dermato-oncology Immune Landscape -- Macrophage-Mediated Cancer Immunology in Cutaneous Malignancies -- The Role of Inflammatory Cells in Skin Cancer Genesis and Possible Therapeutic Implications -- SIRT3 and Cutaneous Cancers -- Comprehensive Surgical Management of Skin Cancers -- Role of Photodynamic Therapy in Oncodermatology -- Immune Mediated Mechanisms Against Cutaneous Melanocytes in Melanoma -- Immunotherapy-based Combination Therapies for Malignant Melanomas -- Morphological Features and Clinical Significance of Tumor Microvessels in Glandular and Squamous Cell Cancers -- Skin Microbiome and Cutaneous Lymphoma -- Central Nervous System Tumors in Neurocutaneous Syndromes from Pediatric to Adult Age: A Neuroimaging Perspective -- Novel Approaches to 3D Skin Cancer Models Usability in Research.

The “Cutaneous Cancers: An Interdisciplinary Approach” is the fifteenth volume of the “Interdisciplinary Cancer Research” series, publishes comprehensive volume on diagnosis and treatment of cutaneous cancers. The volume starts with a general chapter on interdisciplinary approach in cutaneous cancers. Epigenomic markers in dermatology is discussed in the next chapter. Macrophage-mediated cancer immunology and the role of inflammatory cells in skin cancer genesis are explained in subsequent chapters. Pathophysiology and treatment of specific cutaneous cancers, including melanoma, are discussed in the following chapters. This is the main concept of Cancer Immunology Project (CIP), which is a part of Universal Scientific Education and Research Network (USERN). This interdisciplinary book will be of special value for dermatologists and oncologists who wish to have an update on diagnosis and treatment of cutaneous cancers.
