Sommario/riassunto	<p>The volume of Springer Proceedings in Geoarchaeology and Archaeological Mineralogy contains selected papers presented at the 10th Geoarchaeology Conference, which took place during September 18–21, 2023, at the South Urals Federal Research Center, the Ural Branch of the Russian Academy of Sciences, Miass, Russia. The Proceedings unite studies in the fields of archaeometry, geoarchaeology, and ancient technologies, based on cases from northern Eurasia, and include archaeometallurgy, stone tools investigation, exploitation of geological resources in the past, bioarchaeology, residue analysis, pottery and lithics investigation, use of the GIS in archaeology. A study of non-organic materials, rocks, minerals, ores, metals, metallurgical slags is a special focus of the book. Many papers also use modern analytical methods of isotopic, chemical, and mineralogical analysis to study the composition and structure of ancient materials and the technological practices of past human populations of Modern Russia, Caucasus, and Serbia. The volume is intended for archaeologists, historians, museum staff, and geologists, as well as students, researchers from other disciplines, and the general public interested in the interdisciplinary research in the field of archaeology and archaeological materials, strategies and techniques of past quarrying, mining, metallurgy and lithic technologies at different chronological periods in Northern Eurasia.</p>
