Collana	Springer Proceedings in Business and Economics, , 2198-7254
Disciplina	658.4062 658.514
Soggetti	Technological innovations Business information services Sustainability Innovation and Technology Management IT in Business
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1: Stimulating Innovation: The Role of Intellectual Property Rights Incentives in Global Virtual Teams -- Chapter 2: Design of an analysis grid based on the Living Lab concept to assess innovative initiatives in the forestry sector -- Chapter 3: Evaluation of a cross-university certification system in project management.
Sommario/riassunto	This proceedings volume contains selected papers from the 33rd International Association for Management of Technology (IAMOT) Conference, held from July 8-11, 2024, in Porto, Portugal. It is the second volume of a three-volume set of conference proceedings focused on technologies for a sustainable future. The book explores the challenges and opportunities in today's social and business landscapes, delving into innovative and disruptive concepts. With a special emphasis on the role of technologies, it sheds light on how they enable novel approaches to address current issues. The volume demonstrates that, following the principles of Industry 5.0,

technologies can go far beyond productivity and economic gains, contributing to the benefit and comfort of human workers. It also elucidates the necessity of adopting a human-centered approach in utilizing technology to adapt production processes to workers' needs, while ensuring that the implementation of new technologies does not infringe upon the fundamental rights of workers.
