Sommario/riassunto	Environmental Psychology deals with human-environment interactions as relationships between the physical-material and sociocultural outer world, as well as human experience and behavior. This fully revised second edition provides a well-structured, clearly understandable overview of the topics and developments in this increasingly significant sub-discipline of psychology and makes it clear that environmental psychology is a highly relevant field of research and application in the present and future. About the Authors Prof. Dr. Elisabeth Kals is a professor of social and organizational psychology at the Catholic University of Eichstätt-Ingolstadt. Dr. Isabel T. Strubel is a lecturer at the chair of social and organizational psychology at the Catholic University of Eichstätt-Ingolstadt. Prof. Dr. Jürgen Hellbrück is a retired professor of work, environmental, and health psychology at the Catholic University of Eichstätt-Ingolstadt. The translation was done with the help of artificial intelligence. A subsequent human revision was done primarily in terms of content. This book is a translation of an original German edition. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation.
