Altri autori (Persone)	RifkinJeremy
Soggetti	environmental economics sustainable development soft energy renewable energy economic infrastructure Internet information technology new technology digitisation sustainable mobility
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	A green digital economy could change the future of the Old Continent. The new Smart Europe will be based on three elements: new communication technologies, new sources of energy and new modes of mobility. But the transition will require a transformation of the continental infrastructure.
