Crisis, transitions and sustainability -- Part II. Rethinking development. Ch. 4. Greening the developmental state -- Ch. 5. Rethinking urbanism -- Ch. 6. Soils, land and food security -- Part III. From resource wars to sustainable living. Ch. 7. Resource wars, failed states and blood consumption: insights from Sudan -- Ch. 8. |

Transcending resource and energy-intensive growth: lessons from South Africa -- Ch. 9. Decoupling, urbanism and transition in Cape Town -- Ch. 10. Pioneering liveable urbanism: reflections on an invisible way.

Sommario/riassunto

Current economic growth strategies around the world are rapidly depleting the natural resources and ecosystem services that we depend on. Just Transitions provides a comprehensive overview of these challenges from a Global South perspective. The authors ask: How do developing countries eradicate poverty via economic development, while at the same time facing the consequences of global warming and dwindling levels of cheap oil, productive soils, metals, clean water supplies, and forest products? How do they address widening inequalities in income as well as the need to rebuild ecosystem services and natural resources? The book considers the theme of a just transition, which reconciles the sustainable use of natural resources with a pervasive commitment to sufficiency (where overconsumers are satisfied with less so that underconsumers can secure enough). It explores a range of different viewpoints and ideas and synthesizes them to illuminate new ways of thinking from a sustainability perspective. It rethinks development with special reference to the greening of the developmental state, explores the key role that cities could play in the transition to a more sustainably urbanized world, and highlights the neglect of soils in the global discussions around the potential of sustainable agriculture to feed the world. Case studies drawn from the African continent detail the challenges, but they are set in the context of global trends. The authors conclude with their experiences in building a community that aspires to live sustainably.
