Designing an Activity-Based Budgeting in Ocean View -- 6. Methodology -- 7. Analysis and Findings -- 8. Discussion -- 9. Study Assessment -- 10. Conclusion.
Sommario/riassunto	This brief documents a demonstration project undertaken in Ocean View, Delaware on a novel, scalable tool for police agencies seeking to optimize their patrol operations while providing transparency and accountability in resource management. It describes and explains the broader set of circumstances, conditions, and factors that surrounded and influenced the Ocean View Police Department's goal to expand the agency toward proactive policing. This work encompasses the social, economic, political, and technical aspects that affected the design, implementation, and outcome. The central research question was: If the Ocean View Police Department increases proactive time from 67% to 75%, then how many officers do we need, and what are the projected costs? The study offers a roadmap for agencies looking to expand their proactive policing efforts, and understand the cost drivers associated with the patrol function. The book details the demands that police

agencies face and the complexities of their work. The chapters that follow acknowledge the managerial and fiscal difficulties related to staffing and funding the police, while simultaneously offering suggestions for increased community collaboration. The universal model presented here can be used by all police executives, elected and appointed city officials, academics, finance and directors, analysts.
