Nota di contenuto	Introduction -- Optimising medicine use -- Deprescribing in older people -- Development and implementation of deprescribing guidelines -- The power of the Consumer voice in Knowledge Translation of Deprescribing -- How to age well? Quality of life and polypharmacy in health services research and clinical practice -- Considering frailty in optimising medicine use -- Considering kidney and liver function when prescribing and reviewing medicines in older people -- Dementia and Mild Cognitive impairment -- Healthcare professional perspectives on managing medications in older people in different healthcare settings.
Sommario/riassunto	This book aims to collate contemporary, evidence-based literature regarding the safe and quality use of medicines in older people. It considers the role of engaging consumers in all parts of clinical care and throughout all stages of research to create real-world impact. It includes practical clinical implications from the perspectives of healthcare professionals including physicians, nurses, and pharmacists to improve the use of medicines in older people and reduce their risk of medicine-related harm.
