1.	Record Nr.	UNINA9910999776903321
	Titolo	Advanced Information Networking and Applications : Proceedings of the 39th International Conference on Advanced Information Networking and Applications (AINA-2025), Volume 4 / / edited by Leonard Barolli
	Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2025
	ISBN	3-031-87772-1
	Edizione	[1st ed. 2025.]
	Descrizione fisica	1 online resource (XXXII, 454 p. 166 illus., 139 illus. in color.)
	Collana	Lecture Notes on Data Engineering and Communications Technologies, , 2367-4520 ; ; 248
	Disciplina	620.00285
	Soggetti	Engineering - Data processing Computational intelligence Artificial intelligence Data Engineering Computational Intelligence Artificial Intelligence
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	Broad Learning System Scheme for Multi-Server MEC Wireless Networks -- Investigating the Transferability and Robustness of Adversarial Attacks Between Standard and Dilated CNN Architectures -- Optimized Hybrid Deep Learning Model for Accurate Classification of Alzheimer's Stages -- A Hybrid Machine Learning Method for Detecting Metamorphic Malware -- Assessing the Threat of Neural Network Enhanced Obfuscation in Malware -- Transformative Intelligence in Advanced Security Infrastructure.
	Sommario/riassunto	Networks of today are going through a rapid evolution and there are many emerging areas of information networking and their applications. Heterogeneous networking supported by recent technological advances in low power wireless communications along with silicon integration of various functionalities such as sensing, communications, intelligence and actuations are emerging as a critically important disruptive computer class based on a new platform, networking structure and interface that enable novel, low-cost and high-volume applications.

Several of such applications have been difficult to realize because of many interconnection problems. To fulfill their large range of applications different kinds of networks need to collaborate and wired and next generation wireless systems should be integrated in order to develop high performance computing solutions to problems arising from the complexities of these networks. This volume covers the theory, design and applications of computer networks, distributed computing and information systems. The aim of the volume "Advanced Information Networking and Applications" is to provide latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications.
