| Autore | Gonzalo Arnau Brossa |
| Titolo | First observation of fully reconstructed B0 and Bs0 decays into final states involving an excited neutral charm meson in LHCb. // Arnau Brossa Gonzalo |
| Pubbl/distr/stampa | Cham, Switzerland : , : Springer, , [2023] ©2023 |
| ISBN | 9783031227530 9783031227523 |
| Edizione | [1st ed. 2023.] |
| Descrizione fisica | 1 online resource (241 pages) |
| Collana | Springer theses |
| Disciplina | 539.72162 |
| Soggetti | Mesons Hadrons - Decay |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di bibliografia | Includes bibliographical references. |
| Nota di contenuto | Introduction -- Theory background -- The LHCb detector -- Analysis strategy -- Data samples -- Candidate selection -- Characterisation of backgrounds -- Simultaneous fit -- Signal efficiency -- Systematic uncertainties -- Results. |
| Sommario/riassunto | This book presents the latest results on the branching fraction and phase space distribution of B0 and Bs0 decays into final states including excited neutral charm mesons. This work represents four years of research, and the book describes in detail all the necessary steps and techniques required to perform a physics analysis of the data recorded by the LHCb experiment in the years 2016–2018. Although the results presented in this book represent the first measurement of such decays, the text is written in a manner accessible to Ph.D. students and early career researchers. Thus, all the contents included in this book are described in a pedagogical way, including technical details that would allow the results to be reproduced in future. In addition to the methodology used to perform these measurements, the book also includes a description of the theoretical background required to interpret the results presented, as well as a technical description of the LHCb detector, which provided the data sample used in this study. |
