| Nota di contenuto       | Front Cover -- Subjectivism In Economics and Philosophy: Re-orientating Economic Theory -- Copyright Page -- Table of Contents -- Acknowledgements -- Foreword -- Preface -- Prologue -- Preamble: Re-orientating Economic Theory – Mittermaier’s Challenge to Conventional Approaches -- 1. Introduction -- 2. Argument summary -- 3. The universal and the particular in economic methodology: nominalist and realist perspectives -- 4. Methodological reversal: from general to particular in economic theory -- 5. Beyond the rationalism–empiricism divide: unveiling the nominalist connection -- 6. Taking meaning for granted -- 7. Distinct or familiar: two views of certainty -- 8. Cartesian versus Aristotelian approaches to economic knowledge: Mittermaier’s perspective -- 9. Descartes’ error: equating the distinct with certainty -- 10. The ex-ante/ex-post confusion in revealed preference theory -- 11. Conclusion -- Notes -- References -- Author’s Note -- 1 Introduction -- 1. Philosophy of science applied to economics -- 2. Metalanguage: unit of significance from word to theory-laden facts -- 3. How theory relates to what is before our eyes -- a. The one and the many or the general and the particular -- b. The problem of induction -- c. Realism and nominalism |
| Sommario/riassunto      | This book, authored by Karl Mittermaier, delves into the philosophical underpinnings of economics, focusing on the role of subjectivism  |

within economic theory and methodology. It critiques mainstream economics and positivist approaches, advocating for a realist perspective that emphasizes the relationship between theory and empirical content. The text also explores the historical evolution of economic thought, including the contributions of figures like Carl Menger and Austrian economics. Geared towards academics and researchers in economics and philosophy, the book aims to provide a deeper understanding of how subjective elements influence economic analysis and decision-making, while challenging conventional paradigms and methodologies.
