Sommario/riassunto	"This insightful book examines the use of advanced technology, specifically artificial intelligence (AI), both as a tool in the hands of terrorists and as a powerful security counter-measure. It sheds light on the legal issues arising from the presence of AI in national security matters and identifies how AI can be regulated in this sensitive field. Arianna Vedaschi and Chiara Graziani illustrate the importance of

safeguarding human rights while utilising advanced counter-terrorism tools and analyse the consequent legal challenges posed by AI. Adopting a comparative legal perspective, this book provides a comprehensive overview of counter-terrorism in Western democracies and advocates for a regulatory framework on the use of AI in national security. This book is an essential resource for scholars and students of comparative law, constitutional and administrative law, global and transnational law and terrorism and security law. Judicial and human rights practitioners will also benefit from this volume"--

Sommario/riassunto	Als Tag der Terroranschläge auf New York und Washington ist der 11. September 2001 unvergessen. Aber war 9/11 „ein Tag, der die Welt veränderte“? Die AutorInnen hinterfragen bisherige historische und politologische Einordnungsversuche und zeichnen die Entwicklungen bis zum Sommer 2015 nach, um neue Forschungsdiskussionen anzustoßen und die transatlantischen Dimensionen des 11. September

aufzuzeigen. Zeitenwende 9/11? strebt eine transatlantische Bilanz knapp anderthalb Dekaden nach den Ereignissen an. Es wird untersucht, welche historische Bedeutung das Datum 11. September in vergleichender transnationaler und multidisziplinärer Perspektive hat. Die Autoren bieten Antworten an auf die Frage, ob die Geschehnisse dieses Tages in der Innen- und Außenpolitik, aber auch der Medienlandschaft Europas und der USA so tiefgreifende Wandlungsprozesse angestoßen haben, dass man von einer „Zeitenwende“ sprechen kann.
