Sommario/riassunto	Nicht nur anderswo, sondern auch in deutschen Stadten gestaltet sich die soziale Lage in privilegierten Vierteln einerseits und Quartieren mit struktureller Benachteiligung andererseits extrem unterschiedlich. Bei der Suche nach Gegenmitteln wird immer deutlicher: Ein Engagement für soziale Gerechtigkeit muss auch Perspektiven der Umwelt- und Energieverteilungsgerechtigkeit beinhalten. Dazu bedarf es einer multiperspektivischen Betrachtung und einer interdisziplinären Zusammenarbeit. Die Beiträger*innen verhandeln diese Pramissen und laden über wissenschaftliche Grenzen hinweg dazu ein, aus unterschiedlichen Blickwinkeln neue Zukunftsideen für eine sozial gerechte Stadt zu diskutieren.

Sommario/riassunto	Due to the increasing importance of product differentiation and collapsing product life cycles, a growing number of value-adding activities in the industry and service sector are organized in projects. Projects come in many forms, often taking considerable time and consuming a large amount of resources. The management and

scheduling of projects represents a challenging task, and project performance may have a considerable impact on an organization's competitiveness. This handbook presents state-of-the-art approaches to project management and scheduling. More than sixty contributions written by leading experts in the field provide an authoritative survey of recent developments. The book serves as a comprehensive reference, both, for researchers and project management professionals. The handbook consists of two volumes. Volume 1 is devoted to single-modal and multi-modal project scheduling. Volume 2 presents multi-project problems, project scheduling under uncertainty and vagueness, managerial approaches and a separate part on applications, case studies, and information systems.
