

1. Record Nr.	UNINA9911004709903321
Titolo	Stainless steel in concrete [[electronic resource]] : state of the art report / / prepared by the EFC Working Party on Corrosion of Reinforcement in Concrete ; edited by Ulf Nurnberger
Pubbl/distr/stampa	London, : Published for the European Federation of Corrosion by the Institute of Materials, 1996
ISBN	1-907747-60-5 1-60119-189-8
Descrizione fisica	1 online resource (46 p.)
Collana	European Federation of Corrosion publications ; ; no. 18 Book ; ; no. 657
Altri autori (Persone)	NurnbergerUlf
Disciplina	620.1723
Soggetti	Reinforcing bars - Corrosion Reinforced concrete - Corrosion Stainless steel - Corrosion
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 27-29).
Nota di contenuto	Contents; Series Introduction; Preface; Introduction; General statements; Reported Corrosion Resistance of Stainless Reinforcement; Conclusions; Open Questions; References; Annex
Sommario/riassunto	An up-to-date review of the research and testing being done in several countries to clarify factors affecting the performance of stainless steel reinforcement in concrete exposed to aggressive environments. Highlights differences in the behaviour of the more common grades of stainless steel and considers relative costs and potential areas of application.
