

1. Record Nr.	UNINA9911004718503321
Autore	Madsen Paul
Titolo	North American Tunneling 2022 Proceedings
Pubbl/distr/stampa	Littleton : , : Society for Mining, Metallurgy & Exploration, Incorporated, , 2022 ©2022
ISBN	9781523145690 1523145692 9780873355025 0873355024
Edizione	[1st ed.]
Descrizione fisica	1 online resource (946 pages)
Altri autori (Persone)	CrowMatthew FalcoLouis MorganAmanda MurtaghKathy
Disciplina	624.193
Soggetti	Tunnels - Design and constructions Tunneling
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Cover -- Copyright -- Contents -- Preface -- TRACK 1: TECHNOLOGY -- Session 1: Construction Innovation -- E-Power Pipe: Two-Stage Trenchless Method for Long Drives in Small Diameters -- Innovative Approach for Dust Control in Tunnel Construction -- Precision Drilling for the Pardee Chemical Feed Shaft Project -- Vintage TBM Cuts Months Off Schedule in San Antonio -- Session 2: TBM Technology -- Effect of Machine and Operational Parameters on Utilization Factor -- Hard Rock Tunnel Boring in Challenging Conditions at the Jefferson Barracks Tunnel -- The Machine Within a Machine: TBM Innovation in Vancouver, British Columbia, Canada -- The Next Generation of Mixed Ground Tunnel Boring Machines -- Unprecedented In-Tunnel Diameter Conversion of the Largest Hard Rock TBM in the U.S. -- Session 3: Innovation Solutions -- Automation in Segment Production and Integration of Artificial Intelligence -- Considerations for Conveyor Belts in Tunneling Applications -- Emerging Safety and Productivity

Technologies for North American Tunneling -- Environmentally Friendly Soil Conditioning for EPB TBM: The State of Environmental Considerations in North America and Around the World -- Lateral Deflections and Vertical Control in Tunnel Control Networks -- Long Distance Tunnelling: Challenges and Trends -- Slurry Treatment Plants in Mechanized Tunneling Operations-Safety, Performance and Cost Factor for Jobsites -- Session 4: Design Innovations -- Applications of Artificial Intelligence in Tunnel Design and Construction -- Breaking Conway's Law: Getting the Benefits from Integrated Design Automation -- How Correct are Geostatistical Models in Predicting Soil Transitions? -- Predicting Utilization Rate of Hard Rock Slurry TBMs by Discrete Event Simulation Model -- Soil Conditioning for Potomac Group Soils in Washington DC -- Session 5: Digital Technology. 360-Degree 3D Digital Assessment of Subsurface Water Infrastructure -- Development of the ITA "BIM in Tunneling-Guideline for Bored Tunnels" -- Implementing BIM Underground on Progressive Design-Build Atlanta Plane Train West Extension Project -- The Use of Cloud-Based Geotechnical Software During the Final Design of the New Haven Downtown Storm Sewer Infrastructure Improvement Project -- TRACK 2: PLANNING -- Session 1: Underground Project Delivery -- Benefits and Challenges of Progressive Design-Build Procurement-Atlanta Plane Train Project -- Built to Last? A UK Initiative to Manage Tunnel Infrastructure -- An Introduction to Low-Density Cellular Concrete and Advanced Engineered Foam Technology -- Session 2: Rehabilitation/Fire Life Safety -- Application of Large Diameter Single-Bore Tunnel for Subway Systems -- Flow Control in Tunnels -- Freight Trains in Tunnels-Operational & -- Safety Aspects from the Tunnel Ventilation Perspective -- Historic Rock Tunnel Rehabilitation-Designing for the Unknown -- Tunnel Options for the Mokelumne Aqueducts Resiliency Project -- Underwater Tunnel Repair with Stainless Steel Segmental Liner -- Session 3: Underground Project Risk -- Bridging the Gap-From Borehole Spacing to DSC Claim Resolution -- Improved Contracting Practices and Ground Risk Management Using Geostatistics -- Keep 'Em Separated-Managing Contract Interfaces for the Westerly Storage Tunnel (WST) -- Risk Modelling Techniques for Complex Tunnelling Projects from Deterministic to Probabilistic Methods: Have We Done Enough? -- The State of DRB's in the Tunnel Industry -- Updating the GBR Gold Book -- Session 4: Future Projects -- Commuter Rail Tunnel Alignment Studies for the Pennsylvania Avenue Extension, San Francisco -- Deep Rock Wastewater Tunnel in Delco -- Design and Construction Challenges for the Ellicott City North Tunnel. Horizon Lateral: Reliability to Meet Community Needs Today and Tomorrow -- Planning for Emerging Technology Underground Connection Between Rancho Cucamonga Metrolink Station and Ontario International Airport -- A Tunneled Solution for the Cemetery Brook Drain in Manchester, New Hampshire -- Session 5: Project Design -- Characterizing Gassy Ground and Its Importance -- Connecting Three Pump Stations, with Tunnels, on an Island, in Charleston, SC -- TRACK 3: DESIGN -- Session 1: Tunnel Lining Design -- Analysis and Design of Tunnel Lining Through a Potentially Displaceable Fault -- Design of Precast Segmental Tunnel Lining for Pawtucket CSO Tunnel Project -- Hard Rock Pressure Tunnel Final Lining Design Guide Summary -- Session 2: Design of Underground Spaces -- Amtrak East River Tunnels Structural Repairs and Reconstructions -- Newly Adopted Structure Criteria for BART Underground Facilities-Industry Update -- Single Tube Versus Twin Tubes for Subway Systems -- What Is Dry and Does Your Tunnel Need to Be? -- Session 3: Challenging Design Issues --

Can We Mine Yet? Criteria for Grouting Completion in Tunnel Headings -- Design and Construction of a Shallow Twin Tube Bifurcation-Atlanta Plane Train West Extension Project -- Design of Montreal Metro Blue Line Extension Tunnel -- Three Rivers Protection and Overflow Reduction Tunnel (3RPORT) City of Fort Wayne Tunnel Alignment and Adit Redesign in Construction: A Schedule Driven Journey -- Session 4: Innovative Designs -- A Case Study Establishing Optimization Techniques and the Procedure for Successful Numerical Simulation of Ground-Structure Interaction -- Trenchless Utility Relocation Addresses Environmental Impact for Channel Crossing -- Tunnel Load Rating-A Case Study: Port of Miami Tunnel -- Session 5: Numerical Modeling. Analytical Behavior of a Tunnel with Rock Bolts and Shotcrete During an Extreme Fire Event -- Groundwater Pressure Consideration on Partially Drained Tunnel Lining Rehabilitation Design -- Lateral Rock Load Estimation for Cut and Cover Structures -- TRACK 4: CASE HISTORIES -- Session 1: TBM Performances and Challenges I -- Cutterhead Inspection and Maintenance on the Coxwell Bypass Tunnel Project in Toronto, ON -- Design and Construction of NEORSD's Doan Valley Storage Tunnel -- The Northeast Boundary Tunnel-A TBM Performance Review -- Seattle's Ship Canal Water Quality Project-Curved Microtunnel Drive -- Session 2: TBM Performances and Challenges II -- Evaluating the Impact of DSC's on TBM Performance in Devonian Dolomite -- Mechanized Tunneling in Flowable River Sands-The TBM Drives of the Annacis Island WWTP New Outfall System -- Micro Seismic Monitoring and Analysis for Rock Burst Prone Tunnels Utilizing TBMs -- Overcoming Challenges in Tunneling for Albany's Beaver Creek Clean River Project, Albany, New York -- TBM Breakthroughs in Pressurized Conditions-Three Rivers Protection and Overflow Reduction Tunnel (3RPORT) and Northeast Boundary Tunnel (NEBT) Projects -- TBM Tunnel Logistics Management on the Longest Outfall Tunnel in the Middle East -- Session 3: SEM/NATM Excavation Techniques -- Courthouse Commons Tunnel: A Case Study of Modern SEM Tunneling -- Design and Construction Challenges for the North Temple Tunnel -- Ground Improvement Works and Construction of Six SEM Adits as Part of the Northeast Boundary Tunnel Project in Washington, D.C. -- San Diego Courthouse Commons Tunnel: Challenges and Design Solutions -- Underpinning of an Operational Subway Aided by Mined Galleries -- Session 4: Shaft Excavation, Tunnel Rehabilitation, and Challenges -- Construction Challenges of the Anderson Dam Tunnel Project. Conventional Excavation of New Inlet/Outlet Tunnel for Newell Creek Dam, CA -- Design and Construction of Large-Scale Ventilation Caverns on WestConnex's Rozelle Interchange Project -- Out with the Old, In with the New: How We've Come Full Circle from the Burning River -- Slurry Wall Construction in Coarse-Grained Soils -- Tunnel Rehabilitation Through Historic Landslides in Laguna Beach -- Unique Challenges for the Construction of PATH's Exchange Place Cross-Passage Tunnel -- Session 5: Geotechnical and Contracting Cases -- Analysis of Near Field Vibration Monitoring in Construction Blasting -- Hybrid Shoring Design for the Courthouse Commons Tunnel in San Diego, California: Controlling and Predicting Ground Movements -- Implementation of Vibration Monitoring to Improve Blast Design for the Mitchell Point Crossing -- Karst Feature Investigation, Mitigation Design, Specification, and Contract Provisions -- Parametric Study of Portal Area Condition for Mountain Tunnel Damaged by Earthquake -- Index -- Back Cover.

Sommario/riassunto

Crafted from a collection of 92 papers presented at the North American Tunneling Conference, this book takes you deep inside the latest case histories, expertise, lessons learned, and real-world applications from

around the globe. It includes sections on technology, planning, design,
and case histories.
