

1. Record Nr.	UNINA9911004728603321
Titolo	Rock physics and geomechanics in the study of reservoirs and repositories
Pubbl/distr/stampa	London, : Geological Society, 2007
ISBN	1-86239-867-4 1-5231-2246-3
Collana	Geological Society special publication ; ; 284
Disciplina	552.06
Soggetti	Rock mechanics - Geology Petroleum Geology, Stratigraphic Reservoirs Petrology Hydrogeology Mechanical Engineering Engineering & Applied Sciences Metallurgy & Mineralogy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Rock physics and geomechanics in the study of reservoirs and repositories / C. David & M. Le Ravalec-Dupin -- Fractured rock hydromechanics : from borehole testing to solute transport and CO storage / C. F. Tsang, J. Rutqvist & K. B. Min -- Overview of key experiments on repository characterization in the Mont Terri Rock Laboratory / P. Bossart -- Velocity survey of an excavation damaged zone : influence of excavation and reloading / J. Damaj, [et. al.] -- Temperature-induced evolution of the elastic and magnetic anisotropy in arillite samples from Bure underground research laboratory, eastern France / P. Robion, C. David & C. Colombier -- Investigation of the undrained poroelastic response of sandstones to confining pressure via laboratory experiment, numerical simulation and analytical calculation / G. Blocher, [et. al] -- Compaction bands and the formation of slot-

shaped breakouts in St. Peter sandstone / B. Haimson & A. Klaetsch --
Models for compaction band propagation / J. W. Rudnicki --
Characterization of pore-space heterogeneity in sandstone by x-ray
computed tomography / L. Louis, P. Baud & T. F. Wong -- Using
production data and time domain seismic attributes for history
matching / A. Fornel, M. Mezghani & V. Langlais -- Influence of
persistence on behaviour of fractured rock masses / B. H. Kim, P. K.
Kaiser & G. Grasselli -- Using physical properties to understand the
porosity network geometry evolution in gradually altered granites in
damage zones / M. Rosener & Y. Geraud -- Numerical modelling of
pressure solution deformation at axisymmetric asperities under normal
load / Y. Bernabe & B. Evans -- Weak elastic anisotropy in a cracked
rock / T. F. Wong & W. Zhu -- Index.
