

1. Record Nr.	UNINA9911004738003321
Autore	Macario Rosario
Titolo	Managing urban mobility systems / / Rosario Macario
Pubbl/distr/stampa	Bingley, U.K., : Emerald, 2011
ISBN	9786613223234 9781283223232 1283223236 9781613449400 1613449402 9780857246127 0857246127
Edizione	[1st ed.]
Descrizione fisica	1 online resource (334 p.)
Disciplina	338.4068 388.049
Soggetti	Urban transportation policy Urban transportation - Planning Transportation - General Road transport industries
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Prelims -- Introduction -- A theoretical framework for the management of urban mobility systems -- Simplifying complexity in urban mobility systems -- Configuration of quality factors in urban mobility systems -- How to set up a management model for urban mobility systems -- The need for a strategic approach to urban development -- Bibliography -- Annexes.
Sommario/riassunto	Urban mobility is a major problem all over the world. Space is limited, and individuals aim for a level of quality in mobility that is only achieved by largely motorised solutions, which have a detrimental effect on the urban environment. Careful analysis of urban mobility systems (UMS) across the world reveals that consistent and effective policies can only be implemented if the various components of the system and their interrelations are considered. This book addresses the

problem of managing urban mobility systems by considering the  
complexity and diversity of the conurbation and agents in
