

1. Record Nr.	UNINA9911004745903321
Autore	Miller Bruce G
Titolo	Clean coal engineering technology / / Bruce G Miller
Pubbl/distr/stampa	Burlington, MA, : Butterworth-Heinemann, 2010
ISBN	1-282-87879-4 9786612878794 0-08-096116-9
Descrizione fisica	1 online resource (696 p.)
Disciplina	662.6/20286
Soggetti	Clean coal technologies Coal - Environmental aspects Coal-fired power plants Coal-fired furnaces
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; Clean Coal Engineering Technology; Copyright; Dedication; Contents; Preface; Chapter 1: Coal as Fuel; 1.1. Organization of this Book; 1.2. The History of Coal Use; 1.3. Coal Use before the Industrial Revolution; 1.3.1. The Early History of U.S. Coal Mining and Use; 1.4. Coal Use during the Industrial Revolution; 1.5. The Post-Industrial Revolution Use of Coal; 1.6. An Overview of Energy in the United States; 1.7. Coal Production in the United States; 1.8. Coal Consumption in the United States; 1.9. U.S. Coal Exports and Imports 1.10. World Primary Energy Production and Consumption 1.10.1. World Primary Energy Production; 1.10.2 World Primary Energy Consumption; 1.11. Projections of Energy Use and Coal's Contribution to the Energy Mix; 1.11.1 World Consumption of Liquid Fuels; 1.11.2 World Consumption of Natural Gas; 1.11.3 World Consumption of Coal; 1.11.4 World Consumption of Nuclear Energy; 1.11.5 World Consumption of Renewable Energy; 1.11.6 Energy Outlook for the United States; 1.12. Coal's Role in the U.S.'s 2001 Energy Policy; References; Chapter 2: The Chemical and Physical Characteristics of Coal 2.1. The Definition of Coal 2.2. Origin of Coal; 2.3. Coalification; 2.4.

The Classification of Coal; 2.4.1 Basic Coal Analysis; 2.4.2 The Ranks of Coal; 2.4.3 The Types of Coal; 2.4.4 The Grades of Coal; 2.4.5 Classification Systems; References; Chapter 3: The Worldwide Distribution of Coal; 3.1 Coal Distribution and Resources; 3.1.1 Coal Reserves throughout the World; 3.2 Major Coal-Producing Regions in the World; 3.2.1 North America; 3.2.2 Eurasia; 3.2.3 Middle East, Asia, and Oceania; 3.2.4 Europe; 3.2.5 Africa; 3.2.6 Central and South America; References

Chapter 4: The Effect of Coal Usage on Human Health and the Environment

4.1. Coal Mining; 4.1.1 Underground Mining; 4.1.2 Surface Mining; 4.1.3 Legislation and Reclamation; 4.2. Coal Preparation; 4.2.1 Water Contamination from Preparation Plants; 4.2.2 Air Contamination from Preparation Plants; 4.2.3 Refuse Contaminants from Preparation Plants; 4.2.4 Health and Safety Issues; 4.3. Coal Transportation; 4.4. Coal Combustion By-Products; 4.5. Emissions from Coal Combustion; 4.5.1 Sulfur Oxides; 4.5.2 Nitrogen Oxides; 4.5.3 Particulate Matter; 4.5.4 Organic Compounds; 4.5.5 Carbon Monoxide; 4.5.6 Trace Elements; 4.5.7 Greenhouse Gases-Carbon Dioxide; References; Chapter 5: Introduction to Coal Utilization Technologies; 5.1. Coal Combustion; 5.1.1 Brief History of Boilers and Coal Combustion Systems; 5.1.2 Basic Steam Fundamentals and their Application to Boiler Development; 5.1.3 The Chemistry of Coal Combustion; 5.1.4 Coal Combustion Systems; 5.1.5 Influence of Coal Properties on Utility Boiler Design; 5.2. Carbonization; 5.2.1 Brief History of Carbonization (High-Temperature); 5.2.2 Coking Processes; 5.2.3 Coal Properties for Coke Production; 5.2.4 Coking Conditions; 5.2.5 Low-Temperature Carbonization

Sommario/riassunto

Coal is the dirtiest of all fossil fuels. When burned, it produces emissions that contribute to global warming, create acid rain, and pollute water. With all of the interest and re
