

1. Record Nr.	UNINA9911004798803321
Autore	Gebhardt Andreas
Titolo	Rapid prototyping
Pubbl/distr/stampa	[Place of publication not identified], : Hanser Publishers, 2003
ISBN	9781591248682 159124868X
Edizione	[1st ed.]
Descrizione fisica	1 online resource (392 p.)
Disciplina	620/.0042
Soggetti	Mechanical Engineering Engineering & Applied Sciences Industrial & Management Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface -- Acknowledgements -- Contents -- 1 Product Development – Product Formation – Rapid Product Development -- 1.1 New Demands – New Processes -- 1.1.1 Changing Conditions for Product Development – Critical Factors Affecting Success -- 1.1.2 Consequences for Product Development -- 1.1.3 Critical Factors for Success and Competitive Strategies -- 1.1.4 The Key Factor of Time -- 1.2 Simultaneous Engineering – Concurrent Engineering -- 1.2.1 Classical Steps of Product Development -- 1.2.2 Requirements for New Product-Development Strategies -- 1.2.3 The Principle of Simultaneous Engineering -- 1.3 Models -- 1.3.1 Model Classes -- 1.3.2 Influence of Models to Speed Up Product Development -- 1.4 Model Making by Rapid Prototyping as an Element of Simultaneous Engineering -- 1.4.1 Rapid Prototyping Models as Guarantors of a Defined Database -- 1.4.2 Definition: Rapid Prototyping – Rapid Tooling – Rapid Manufacturing -- 1.4.3 Relating Rapid Prototyping Models to Product Development Phases -- 2 Characteristics of Generative Manufacturing Processes -- 2.1 Basic Principles of Rapid Prototyping Processes -- 2.2 Generation of Layer Information -- 2.2.1 Description of the Geometry by a 3D Data Record -- 2.2.2 Generation of Geometrical Layer Information on Single Layers -- 2.2.3 Projection of Geometrical Layer Information on the Layer -- 2.3

Generation of the Physical Layer Model -- 2.3.1 Solidification of Liquid Materials Photopolymerization – Stereolithography (SL) -- 2.3.2 Generation from the Solid Phase -- 2.3.3 Solidification from the Gaseous Phase – Laser Chemical Vapor Deposition (LCVD)

---

**Sommario/riassunto**

---

Illustrates the benefits that come with the use of models at any stage of the product development process and defines the different types of models. The book covers the fundamentals of Rapid Prototyping and the special capabilities of prototypers, and shows how digital production based on low volume rapid prototyped samples can be realised.
