| Autore | Wan Renpu |
| Titolo | Advanced well completion engineering // Wan Renpu |
| Pubbl/distr/stampa | Burlington, Mass., : Gulf Professional Pub., c2011 |
| ISBN | 9786613164209 9781283164207 1283164205 9780123858696 0123858690 |
| Edizione | [3rd ed.] |
| Descrizione fisica | 1 online resource (737 p.) |
| Disciplina | 622/.3381 |
| Soggetti | Oil well completion |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | The Chinese version of Advanced well completion engineering by Wan Renpu was published by Petroleum Industry Press in 2008. Two column to the page. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Sommario/riassunto | Once a natural gas or oil well is drilled, and it has been verified that commercially viable, it must be ""completed"" to allow for the flow of petroleum or natural gas out of the formation and up to the surface. This process includes: casing, pressure and temperature evaluation, and the proper instillation of equipment to ensure an efficient flow out of the well. In recent years, these processes have been greatly enhanced by new technologies. Advanced Well Completion Engineering summarizes and explains these advances while providing expert advice for deploying these new breakthrough |
