Descrizione fisica	1 online resource
Disciplina	668.55
Soggetti	Cosmetics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	In the completely updated version of this classic and indispensable reference source, you will find the latest developments in cosmetic chemistry and its industrial applications. The author, together with an international team of experts in different fields, bring you, through a practical approach, the most recent advances in: - Physiologic considerations in the formulation of cosmetics - Formulation approaches - Regulatory requirements for the main world markets - Ingredients and manufacturing processes. This book, unlike others in the market, is about cosmeticology (i.e., it includes a very thorough section on the physiology of the skin, nails and hair, that most books leave out).
