Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 85-93) and index.
Nota di contenuto	Chemicals, Cancer and Choices: Risk Reduction Through Markets; Copyright; Table of Contents; Acknowledgments; 1. Introduction; 2. Effects of Synthetic Chemical Exposures on Human Health; 3. Managing Private Risks from Chemical Exposures; 4. Managing Public Risks from Chemical Exposures; 5. Insurance; 6. What Should Be Done?; NOTES; REFERENCES; INDEX; CATO; Back Cover
Sommario/riassunto	One of the most important policy questions we face concerns the health effects on humans of environmental chemicals. The author debunks the conventional wisdom that all animal studies measuring chemical exposure can be used to evaluate the actual danger to people.
