

1. Record Nr.	UNINA9911006499103321
Autore	Palmer Andrew C (Andrew Clennel), <1938->
Titolo	Subsea pipeline engineering / / Andrew C. Palmer and Roger A. King
Pubbl/distr/stampa	Tulsa, Okla., : PennWell Corporation, c2008
ISBN	1-61583-801-5
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (652 p.)
Altri autori (Persone)	KingRoger A. <1945->
Disciplina	621.8/672
Soggetti	Underwater pipelines - Design and construction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	<p>""Contents""; ""List of Figures""; ""List of Tables""; ""Acknowledgments""; ""Preface""; ""Introduction""; ""Route Selection""; ""Carbon- Manganese Steels""; ""Increasing Corrosion Resistance""; ""Welding""; ""Flexible and Composite Pipelines""; ""Internal Corrosion and Its Prevention""; ""External Corrosion, Coatings, Cathodic Protection, and Concrete""; ""Pipeline Hydraulics""; ""Strength""; ""Stability""; ""Marine Pipeline Construction""; ""Shore Approaches""; ""Upheaval Buckling, Lateral Buckling, and Spans""; ""Internal Inspection and Corrosion Monitoring""; ""Risks, Accidents, and Repair""; ""Decommissioning""; ""Future Development""; ""Appendix A: Glossary""; ""Appendix B: Codes and Standards""; ""Appendix C: Units""; ""Index""</p>
Sommario/riassunto	<p>Subsea Pipeline Engineering was the first of its kind, written by two of the world's most respected authorities in subsea pipeline engineering. In the second edition, these industry veterans have updated their definitive reference book, covering the entire spectrum of subjects in the discipline, from route selection and planning to design, construction, installation, materials and corrosion, inspection, welding, repair, risk assessment, and applicable design codes and standards. Particular attention is also devoted to the important specialized subjects of hydraulics, strength, stability, fracture, upheaval, lateral buckling and decommissioning. The book is distilled from the authors' vast experience in industry and their world-renowned course on Subsea Pipeline Engineering.</p>
