Nota di contenuto	A short history of deregulation -- Corporate self-regulation: form versus substance -- The monitoring board -- Corporate self- regulation: the accountant as gatekeeper -- FERC's shortfall as market regulator -- The deregulated gas supply market -- Implosion of the California electricity market-Part I -- Implosion of the California electricity market-Part II -- Market design -- Changing the ground rules -- Conclusion.
Sommario/riassunto	During the last two decades deregulation and restructuring were widely expected to transform the nations energy industries, bringing more competitive pricing and abundant, reliable energy to the public. Instead, consumers and investors in the post-Enron era have suffered losses measured in the billions, attributable to market-rigging, accounting fraud, and business plans that were doomed to failure. In this in-depth look at the latest era of greed, the author explains how the leaders of these companies schemed, collaborated or ignored the obvious signs that signaled the oncoming failures of well-established energy companies. Key Features: What reforms are necessary in corporate accounting and reporting The consequences of corporate boards that blindly rubber-stamp company policies Insight into poorly designed deregulation and the nightmare consequences for the public
