

1. Record Nr.	UNINA9911006508103321
Titolo	Developments in control theory towards glocal control / / edited by Li Qiu ... [et al.]
Pubbl/distr/stampa	London, : Institution of Engineering and Technology, 2012
ISBN	1-62198-289-0 1-283-60428-0 9786613916730 1-84919-534-X
Descrizione fisica	1 online resource (226 p.)
Collana	IET control engineering series ; ; v. 76
Altri autori (Persone)	QiuLi <1961->
Disciplina	515.642
Soggetti	Control theory Control theory - Mathematical models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	7. Maximizing mutual information between random variables and applications to order reduction of stochastic processes; 8. On compact sets in the graph topology; 9. Matrix pencils in time and frequency domain system identification; 10. Identification of nonparametric piecewise affine models via data compression; 11. Performance benefits in two-axle railway vehicle suspensions employing inerters; 12. Stabilization of quantum spin systems via continuous feedback control; Part III. Networked Dynamical Systems and Glocal Control 13. Combining distance-based formation shape control with formation translation; 14. Energy management in wireless sensor networks; 15. Distributed randomized PageRank algorithms over unreliable channels; 16. Stabilization of multi-input networked control systems over additive white Gaussian noise channels; 17. Clustering of large-scale dynamical networks for glocal control; 18. Glocal control for natural oscillations; In Memory of Hisaya Fujioka; Index
Sommario/riassunto	Drawing upon a collection of research articles from celebrated authors in the field of control theory and its applications, this Festschrift honours the work of Professor Shinji Hara, and lays a solid foundation towards the 'glocal control' theory.
