

1. Record Nr.	UNINA9911006550403321
Titolo	Structural and vibration guidelines for datacom equipment centers
Pubbl/distr/stampa	[Place of publication not identified], : American Society of Heating Refrigerating and Air Conditioning Engineers, 2007
ISBN	1-62198-813-9 1-4619-1894-4
Collana	ASHRAE datacom series Structural and vibration guidelines for datacom equipment centers.
Disciplina	725/.23
Soggetti	Structural design - Design and construction Data processing service centers - Vibration Buildings - Protection Earthquake resistant design - Protection Data processing service centers Electronic digital computers Civil & Environmental Engineering Engineering & Applied Sciences Civil Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	"Provides basics for addressing the structural and vibration performance (resistance against wind, snow, and seismic assault) of datacom equipment centers, focusing on the facility (envelope, beams, columns, floor slabs, roof slabs), the building infrastructure (power, cooling, flooring, ceiling systems), and the datacom equipment (servers, storage, tape drives, racks, network equipment)"--Provided by publisher.
