

1. Record Nr.	UNINA9911006565103321
Titolo	Renewable resources for functional polymers and biomaterials : polysaccharides, proteins and polyesters // edited by Peter A. Williams
Pubbl/distr/stampa	Cambridge [England], : RSC Pub., 2011
ISBN	1-62870-152-8 1-84973-351-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (457 p.)
Collana	RSC polymer chemistry series, , 2044-0790 ; ; 1
Altri autori (Persone)	WilliamsPeter A
Disciplina	572.33
Soggetti	Renewable energy sources Renewable natural resources Polymerization Polymers Biomedical materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Renewable Resources for Functional Polymers and Biomaterials_Publicity; i-iv.PDF.pdf; v-vi; vii-xvi; 1-14; 15-47; 48-87; 88-129; 130-165; 166-185; 186-209; 210-260; 261-291; 292-318; 319-345; 346-370; 371-398; 399-429; 430-440
Sommario/riassunto	This book details polysaccharides and other important biomacromolecules covering their source, production, structures, properties, and current and potential application in the fields of biotechnology and medicine. It includes a systematic discussion on the general strategies of isolation, separation and characterization of polysaccharides and proteins. Subsequent chapters are devoted to polysaccharides obtained from various sources, including botanical, algal, animal and microbial. In the area of botanical polysaccharides, separate chapters are devoted to the sources, structure, properties and
