

1. Record Nr.	UNINA9911006579203321
Autore	Larsson Lars
Titolo	Ship resistance and flow
Pubbl/distr/stampa	[Place of publication not identified], : Society of Naval Architects and Marine Engineers, 2010
ISBN	1-61344-138-X
Collana	Principles of naval architecture Ship resistance and flow
Disciplina	623.8/12
Soggetti	Ship resistance - Mathematics Inviscid flow - Mathematics Viscous flow - Mathematics Hulls (Naval architecture) - Mathematics Ships - Hydrodynamics - Mathematics Military & Naval Science Law, Politics & Government Naval Architecture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Governing equations -- Similarity -- Decomposition of resistance -- Inviscid flow around the hull, wave making, and wave resistance -- The flow around the hull and the viscous resistance -- Other resistance components -- Experimental resistance prediction and flow measurement -- Numerical prediction of resistance and flow around the hull -- Empirical resistance prediction -- Hull design.
