

1. Record Nr.	UNINA9911006653403321
Titolo	Computer aided property estimation for process and product design // edited by Georgios M. Kontogeorgis, Rafiqul Gani
Pubbl/distr/stampa	Amsterdam ; ; Oxford, : Elsevier, 2004
ISBN	1-280-96718-8 9786610967186 0-08-047228-1
Descrizione fisica	1 online resource (436 p.)
Collana	Computer-aided chemical engineering, , 1570-7946 ; ; v. 19
Classificazione	35.06
Altri autori (Persone)	KontogeorgisGeorgios M GaniR (Rafiqul)
Disciplina	660.2812
Soggetti	Chemical processes - Computer simulation Matter - Properties - Computer simulation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	pt. 1. Introduction to computer aided property estimation -- Pt. 2. Models for properties -- Pt. 3. Application of property models & databases -- Pt. 4. Challenges & opportunities.
Sommario/riassunto	Properties of chemical compounds and their mixtures are needed in almost every aspect of process and product design. When the use of experimental data is not possible, one of the most widely used options in the use of property estimation models. Computer Aided Property Estimation for Process and Product Design provides a presentation of the most suitable property estimation models available today as well as guidelines on how to select an appropriate model. Problems that users are faced with, such as: which models to use and what their accuracy is, are addressed using a systematical approach
