Sommario/riassunto

This book includes a selection of oral and poster presentations from ""Onshore-Offshore Relationships on the Nordic Margin Conference"" held in Trondheim in 2002. The conference was jointly arranged by the Norwegian Geological Society (NGF) and the Norwegian Petroleum Society (NPF), and attempted, through different thematic sessions, to bridge the gap often noted between industry and academic research. The first part of the conference included presentations under the theme ""Basement control on offshore structuring"" with representative articles from that segment included in this boo
