

1. Record Nr.	UNINA9911006658503321
Autore	IAEA
Titolo	Alternative Commercialization Pathways for Fusion Energy Systems
Pubbl/distr/stampa	Vienna : , : International Atomic Energy Agency, , 2022 ©2022
ISBN	9781523149773 1523149779 9789201217226 9201217226
Edizione	[1st ed.]
Descrizione fisica	1 online resource (142 pages)
Collana	IAEA TECDOC Series No ; ; v.1997
Disciplina	333.79
Soggetti	Energy development Nuclear fusion
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"Fusion energy has potential to contribute to meeting global demand for sustainable energy Increasingly, progressive fusion enterprises are seeking new pathways for the commercialization of the technology, bringing fresh ideas and different perspectives. This publication is a summary of an IAEA Workshop on this topic, outlining the main elements for the development of alternative commercialization pathways for fusion energy systems in the coming decades, bringing together expert opinions from the diverse range of disciplines that are essential to fusion's commercial success. It highlights several critical aspects to consider for new pathways and provides an outline of a roadmap for their development."
