

1. Record Nr.	UNINA9911006660103321
Titolo	Industrial solvents handbook / / edited by Ernest W. Flick
Pubbl/distr/stampa	Westwood, N.J., : Noyes Data Corp., c1998
ISBN	1-59124-103-0
Edizione	[5th ed.]
Descrizione fisica	xxxi, 963 p. : ill
Altri autori (Persone)	FlickErnest W
Disciplina	661/.807
Soggetti	Solvents Organic compounds
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. 960- 961) and indexes.
Sommario/riassunto	Completely revised, and vastly expanded, this Fifth Edition is a well-established and successful reference volume designed principally for the chemical and other process industries, but will be found useful by anyone needing the latest pertinent data on industrial solvents. This Fifth Edition is uniquely helpful when it becomes necessary to select a new solvent on a competitive or comparative basis; when the customary solvent, employed hitherto, might no longer be available, or can no longer be used because of environmental reasons; or when prices have risen to such an extent that an existing process must be redesigned to make it economically feasible again. The over 1,200 tables in this book contain basic data on the physical properties of most solvents and on the solubilities of a variety of materials in these solvents. Even phase diagrams for multicomponent systems are included. Particularly valuable are the comparative data for various solvents in the last chapter.
