

1. Record Nr.	UNINA9911006667203321
Autore	Gapsari Femiana
Titolo	Advanced Materials and Materials Application
Pubbl/distr/stampa	Zurich : , : Trans Tech Publications, Limited, , 2024 ©2024
ISBN	9783036415826 3036415823
Edizione	[1st ed.]
Descrizione fisica	1 online resource (153 pages)
Altri autori (Persone)	CastanieBruno AgarwalRamesh K
Disciplina	620.11
Soggetti	Materials science Sustainable engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Advanced Materials and Materials Application -- Preface -- Table of Contents -- Chapter 1: Structural Metals Processing -- Parameter Design of Sand Casting to Minimize Shrinkage Defects, Porosity Defects and Incomplete Defects -- Hardness and Microstructure of TiN Coating on Aluminum Alloy with DC Sputtering -- Chapter 2: Friction Stir Welding -- Friction Stir Welding between Marine Grade Aa 5083 and HSLA Steel -- Microstructure and Mechanical Characteristics of Friction Welded Joint between Alumina and Aluminum Casting Alloy -- Optimizing Micro Friction Stir Spot Welding (mFSSW) of Aluminum Alloy AA1100 Using Neural Network Model -- The Effect of Friction Stir Weld (FSW) Process Parameters on Tensile Strength, Macro Structure, and Hardness in Results of AA7075 Butt Joints -- Chapter 3: Polymers and Composites -- Incorporating Graphene Nanofiller for the Improvement of Hydrophobic Properties of Cassava Peel Starch Bioplastic -- The Effect of Bleaching Variation on Schoutenia Ovata Korth Fiber as a Composite Reinforcement -- Microcrystalline Cellulose as Composite Reinforcement: Assessment and Future Prospects -- Effect of Silanized Zirconium Oxide (ZrO2) Filler on Hardness of Acrylic-Based Denture Teeth -- Chapter 4: Recycling and Applications of Natural Materials -- Influence of Orthophosphoric Acid Activation on

the Quality of Activated Carbons -- Physical and Morphological
Characterisation of Typha Australis Fibres -- Optimization of the Co-
Production between the Rice Husk and the Pulp of the Cashew Apple
Produced in the Natural Region of Casamance -- Study of the Physic-
Mechanical Properties of a Typha Concrete Composites: A Possible New
Material for Sustainable Construction -- Normal Water Effect on the
Thermal and the Mechanical Properties of Jute Yarns.
Optimizing Aluminum Melting with Sustainable Biomass Fuels: A Case
Study of Ulin (*Eusideroxylon zwageri*) Wood and Galam (*Melaleuca
cajuputi*) Wood -- Keyword Index -- Author Index.

Sommario/riassunto

Special topic volume with invited peer-reviewed papers only.
