Sommario/riassunto	The second edition of this widely accepted industrial guide contains descriptions of more than 2,500 adhesives, sealants, and coatings, which are available to the electronics and related industries. The book, greatly expanded from the previous edition, is the result of information received from 80 manufacturers and distributors of these products. The data, including product specifications, represent selections from the manufacturers' descriptions made at no cost to, nor influence from, the makers or distributors of these materials. Only the most recent information has been included. It is believed that all of the products listed are currently available, which will be of interest to readers concerned with product discontinuances.
