

1. Record Nr.	UNINA9911006679303321
Titolo	Corrosion of glass, ceramics, and ceramic superconductors : principles, testing, characterization, and applications / / edited by David E. Clark and Bruce K. Zoitos
Pubbl/distr/stampa	Park Ridge, N.J., : Noyes, c1992
ISBN	1-282-01366-1 9786612013669 0-8155-1665-7
Descrizione fisica	1 online resource (698 p.)
Altri autori (Persone)	ClarkDavid E ZoitosBruce K
Disciplina	620.1/404223
Soggetti	Ceramic materials - Corrosion Glass - Corrosion Ceramic superconductors - Corrosion
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""Preface""; ""Contributors""; ""Contents""; ""Section I. Theory, Testing and Characterization""; ""1 Theory of Corrosion of Glass and Ceramics""; ""2 Predicting Corrosion""; ""3 Corrosion Testing and Characterization""; ""4 Characterization of Corroded Ceramics by SIMS""; ""Section II. Corrosion of Glass""; ""5 Geochemical Approach To Glass Dissolution""; ""6 Thermodynamic Approach to Glass Corrosion""; ""7 Nuclear Waste Glasses: Corrosion Behavior and Field Tests""; ""8 The Chemical and Environmental Stability of Optical Glasses"" ""9 Surface Modification of Bioactive Glasses and Ceramics""""10 Corrosion of Heavy-Metal Fluoride Glasses""; ""11 Corrosion of Geological and Archaeological Glasses""; ""12 Corrosion of Glazes and Enamels""; ""13 Corrosion and Conservation of Ancient Glass and Ceramics""; ""Section III. Corrosion of Ceramics""; ""14 Corrosion of Glass-Ceramics""; ""15 Corrosion of Ceramic Construction Materials in Acidic Environments""; ""16 Degradation of Ceramic Cutting Tools""; ""17 Degradation of TZP Ceramics in Humid Atmospheres""; ""18 High Temperature Corrosion of Engineering Ceramics""

""Section IV. Corrosion of Ceramic Superconductors""; ""19 Corrosion of Ceramic Superconductors: An Overview""; ""20 Role of Processing in the Corrosion of Ceramic Superconductors""; ""21 Corrosion of YBa₂Cu₃O_{7-x} in High and Low Humidity Environments""; ""22 Surface Science Techniques for Analysis of Corrosion of the Ceramic Superconductors""; ""23 Reducing Corrosion of Ceramic Superconductors with Sol-Gel Coatings""; ""24 Summary""; ""Index""

Sommario/riassunto

This volume presents a compilation of state-of-the-art understanding of ceramic corrosion. It reveals areas of deficiency and it suggests future directions based on the studies of 33 leaders in the field. Significant progress has been made in defining corrosion processes in ceramic materials. New theoretical approaches and improved analytical techniques have served to unify concepts developed in earlier corrosion studies.
