

1. Record Nr.	UNINA9911006712303321
Autore	Casella Ivan R. S
Titolo	Power Line Communication Systems for Smart Grids
Pubbl/distr/stampa	Stevenage : , : Institution of Engineering & Technology, , 2025 ©2024
ISBN	1-83724-373-5 1-83953-925-9
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (584 pages)
Collana	Energy Engineering Series
Altri autori (Persone)	AnpalaganAlagan
Disciplina	621.31
Soggetti	Smart power grids Digital communications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Contents -- Preface -- About the editors -- 1. Introduction Ivan R.S. Casella and Alagan Anpalagan -- 2. Fundamentals of digital communications Ivan R.S. Casella -- 3. Basis of error correction coding Marco A. Cazarotto Gomes and Murilo B. Loiola -- 4. Principles of orthogonal frequency division multiplexing and single-carrier frequency domain equalisation Cristiano Panazio and Renato Lopes -- 5. Modern power line communication technologies Samuel C. Pereira, Ivan R.S. Casella and Carlos E. Capovilla -- 6. Power line communication channel models Pedro I. Cruz, Ricardo Suyama and Ivan R.S. Casella -- 7. Noise mitigation Irvine Mapfumo, Khaled Rabie and Thokozani Shongwe -- 8. Narrowband power line communication systems: PRIME and G3-PLC/IEEE 1901.2 performance Ivan R.S. Casella, Samuel C. Pereira and Carlos E. Capovilla -- 9. Broadband power line communication systems: IEEE 1901 performance Ivan R.S. Casella, Samuel C. Pereira and Carlos E. Capovilla -- 10. A guide to prototyping broadband and capacitive power line communication coupling circuits for low-voltage electric power grids Luís Guilherme da Silva Costa, Wesley Mateus Cantarino, Gabriel Nóra de Souza Ribeiro, Cláudia de Magalhães Santos Fonseca, Mateus de Lima Filomeno, Ulysses Roberto Chaves Vitor and Moisés Vidal Ribeiro -- 11. Smart grids and the use of power line communications Ivan R.S. Casella --

12. Performance evaluation of PRIME power line communication modems over distribution transformers: a case study | Konark Sharma and Lalit Mohan Saini -- 13. Power line communication for monitoring and control of distributed energy resources in smart grids | A. Pinomaa, A. Krimer, I. Demidov, A. Romanenko, A. Kosonen and J. Ahola -- 14. Power line communication devices for electric vehicles charging infrastructure: progress, challenges, opportunities and status | Konark Sharma and Isha -- 15. Demand side management through power line communication: concepts and challenges | Nikolaos G. Paterakis, Samina Subhani and Muhammad Babar -- 16. Direct torque control for a wind doubly fed induction generator employing power line communication technology in smart grid environments | Samuel C. Pereira, Andre L.L.F. Murari, Jose A.T. Altuna, Rogerio V. Jacomini, Edmarcio A. Belati, Carlos E. Capovilla, Alfeu J. Sguarezi Filho and Ivan R.S. Casella -- 17. The use of non-linear filtering to improve the performance of narrowband power line communication in smart grid applications | Samuel C. Pereira, Ivan R.S. Casella and Carlos E. Capovilla -- 18. Multiple-input multiple-output systems design for narrowband power line communication in smart distribution grids | Theofilos A. Papadopoulos, Andreas I. Chrysochos and Grigoris K. Papagiannis -- 19. Analysis of hybrid communication systems for smart grids | Fabiano Salvadori, Camila S. Gehrke, Fabrício B. S. de Carvalho and Alexandre C. Oliveira -- Index

Sommario/riassunto

Power line communications enable electric power system components to use the very power lines for communication about voltage, frequency, generation and loads. This work covers the technology systematically. This second edition offers updates and new content on noise types, mitigation, and properties of power line channels.
