

1.	Record Nr.	UNINA9910712127803321
	Titolo	Historical comparison of capacity build decisions from the Regional Energy Deployment System (ReEDS) model
	Pubbl/distr/stampa	Golden, CO, : National Renewable Energy Laboratory
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9911006715103321
	Autore	Yaduvanshi Rajveer S.
	Titolo	Terahertz dielectric resonator antennas for high speed communication and sensing : from theory to design and implementation / / Rajveer S. Yaduvanshi
	Pubbl/distr/stampa	Stevenage : , : Institution of Engineering & Technology, , [2022] ©2022
	ISBN	1-83724-590-8 1-5231-4259-6 1-83953-356-0
	Edizione	[1st ed.]
	Descrizione fisica	1 online resource (xiv, 399 pages) : b illustrations
	Collana	Telecommunications
	Disciplina	621.3
	Soggetti	Antennas (Electronics) Telecommunication systems - Equipment and supplies Dielectric resonators Terahertz technology - Materials - Electric properties Antenna radiation patterns
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Intro -- Contents -- About the author -- Preface -- 1. Dielectric resonator antennas (DRAs) and its synthesis -- 1.1 Introduction -- 1.2 CDRA (cylindrical DRA): design and modeling using silicon-radiating

element -- 1.3 Terahertz or quantum devices characteristics -- 1.4
 Terahertz MIMO DRA parameters -- 1.5 Main functions of terahertz
 DRA -- 1.6 THz DRA model design parameters -- 1.7 Rectangular
 nano-DRA design parameters -- 1.8 Conclusion -- References -- 2.
 Dielectric resonator antennas-a comprehensive review -- 2.1
 Introduction -- 2.2 Propagation of light -- 2.3 Design of a terahertz
 dielectric resonator antenna -- 2.4 Fabrication and testing -- 2.5
 Terahertz antenna far-field radiations: flowchart -- 2.6 Mathematical
 analysis of terahertz RDRA -- 2.7 Approximate analysis of a
 rectangular quantum antenna -- 2.8 Terahertz DRA simulation results
 -- 2.9 Conclusion -- References -- 3. Light-matter interaction in
 terahertz dielectric resonator antennas (DRA) -- 3.1 Introduction -- 3.2
 Light-matter interaction theory in a quantum antenna -- 3.3 Theory of
 quantum entanglement -- 3.4 Conclusion -- Reference -- 4. Terahertz
 dielectric resonator antennas design and modeling -- 4.1 Introduction
 to terahertz DRA -- 4.2 Mathematical formulations used to describe
 working of quantum DRA -- 4.3 Cylindrical terahertz DRA -- 4.4
 Conical terahertz DRA -- 4.5 Conclusion -- References -- 5. Surface
 plasmon polytrons (SPP) into terahertz DRA -- 5.1 Introduction -- 5.2
 Working principle of TDRA -- 5.3 Terahertz CDRA design and
 simulations -- 5.4 Terahertz DRA main features -- 5.5 Mathematical
 formulations used in TDRA -- 5.6 Terahertz DRA applications -- 5.7
 Conclusion -- References -- 6. Terahertz conical dielectric resonator
 antenna-design, simulation and implementations -- 6.1 Introduction
 -- 6.2 Design structure of conical THz DRAs.
 6.3 Model-1 multiband conical TDRA -- 6.4 Mathematical modeling of
 terahertz conical DRA -- 6.5 Equivalent electrical circuit of conical
 terahertz DRA -- 6.6 Conclusion -- References -- 7. Cylindrical
 terahertz and optical DRA-design and analysis -- 7.1 Introduction --
 7.2 Model 2 TCDRA at 10-THz resonant frequency -- 7.3 Terahertz
 antennas detailed description -- 7.4 Theory of terahertz cylindrical
 DRA and mathematical formulations -- 7.5 Optical CDRA description --
 7.6 Conclusion -- References -- 8. Spherical terahertz and optical
 DRA-design and implementations -- 8.1 Introduction -- 8.2 Design of
 terahertz spherical DRA at 511 THz -- 8.3 Mathematical formulations
 of terahertz spherical DRA -- 8.4 Results and discussions -- 8.5 MIMO
 (multi-input-multi-output) spherical DRA -- 8.6 Conclusion --
 References -- 9. Rectangular terahertz DRA-design, simulation and
 implementations -- 9.1 Introduction -- 9.2 Propagation of light -- 9.3
 Design and simulation of terahertz dielectric resonator antenna -- 9.4
 Synthesis of a terahertz rectangular DRA at optical frequency and its
 radiation theory -- 9.5 Mathematical analysis of resonant modes
 excited into a terahertz rectangular DRA -- 9.6 Terahertz optical RDRA
 at 484 THz -- 9.7 Conclusion -- References -- 10. Equivalent circuit
 analysis on terahertz and optical dielectric resonator antennas (DRAs)
 -- 10.1 Introduction -- 10.2 Quantum DRA-equivalent circuit
 mathematical analysis for mixed circuits -- 10.3 Higher order resonant
 modes -- 10.4 Bandwidth (BW) of terahertz DRA -- 10.5 Simulated
 results based on MATLAB -- 10.6 Design development and evaluation
 of NDRA -- 10.7 Synthesis of NDRA radiation theory -- 10.8 Drude's
 model -- 10.9 MATLAB program -- 10.10 Conclusion -- References --
 11. Optical DRA for retinal applications-next generation DRAs -- 11.1
 Introduction.
 11.2 Optical antenna arrays basic requirements -- 11.3 Optical antenna
 design -- 11.4 Entanglement -- 11.5 Modeling of optical antennas --
 11.6 Light-matter interaction -- 11.7 Theory of coupled resonant
 modes -- 11.8 Designs of terahertz DRAs simulation results for various
 shapes -- 11.9 Conclusion and applications -- References -- 12.

Conclusion and futuristic vision -- 12.1 Introduction -- 12.2 Patient-centric healthcare system outline -- 12.3 Thumb DRA sensors integrated with patient-centric healthcare system -- 12.4 Thumb DRA design and implementations -- 12.5 Conclusion -- Appendix A: Case studies -- Appendix B: Terahertz absorbers -- Appendix C: Antenna measured values in anechoic chamber -- Appendix D: Dielectric materials and resources -- Appendix E: Dual-band graphene antenna design and implementation -- Appendix F: Miniaturization design techniques -- Appendix G: Gaussian beam feed process -- Appendix H: Silicon dielectric resonator antenna at 5-THz frequency -- Appendix I: DRA designing process -- Appendix J: DRA design case study -- Appendix K: Vector network analyzer process for calibration -- Glossary -- Index.

Sommario/riassunto

This book covers the theory, modelling, design and implementations of Terahertz Dielectric Resonator Antenna technologies at microwave, terahertz or optical frequencies for future applications in wireless high-speed communication, wireless personal communication and sensor networks. Case studies with prototype models are included.
